

IRMA TIMES

Items From Kinsella District

Mrs. F. Jack and Elaine were week-end guests of relatives at Irma.

Teachers and pupils of the Kinsella schools have been busy cleaning up the school yard and planting flowers.

At a shower held on Saturday, May 10th, Mrs. Gordon Meakins, a recent bride was the recipient of many lovely and useful gifts which were presented to her in a decorated basket by Shirley Davis and Mary Bilo.

On Sunday, May 11th the infant daughter of Mr. and Mrs. K. Overbo was baptised in the United Church and given the name, Darlene Caroline.

Mr. F. Long of Edmonton spent the week-end with his family here. Mrs. J. Murray and Mr. M. Unilouski are at present patients in the Viking hospital. We wish them a speedy recovery.

Jarrow Jottings

Edmonton, is visiting with her grandparents, Mr. and Mrs. A. Christenson.

Mr. C. Michael and Mr. A. Gustavson are Edmonton visitors this week.

The local United church was tastefully decorated for its Mothers' Day Service on Sunday evening, May 11.

Sunday school will be held at 7:30 Sunday evenings instead of at 11 a.m. as formerly announced. Our church now boasts a new coat of varnish on its interior woodwork.

Jarrow citizens have gone garden mad this week—the annual race with cutworms and weather is on.

Mrs. P. Wright is enjoying a visit from her sister, Edna.

Mrs. G. K. Meakins attended a shower held in her honor at Kinsella on Saturday, May 10.

Mr. Martin Lovig was a patient at the Hardisty hospital on May 7. Mr. and Mrs. Ed. Bruhaug enjoyed a visit from their former neighbor, Mrs. William Millar, now of Edmonton.

Miss Freda Belton is employed at McCune's General Store.

The local Alberta Pool Elevator will be closed every Wednesday afternoon in the absence of the agent, Mr. W. R. Meakins, who will be at that time be at the Alberta Pool Elevator in Philips.

A softball game of interest to the Jarrow young people was played here on Monday afternoon when an Irma public school team took on the local lads. To Irma went the honors in a score of 27-15.

Mr. and Mrs. Harvey Guitner and family, residents in the Batts district for a short time this spring, moved to Edmonton last week.

NOTICE

VILLAGE OF IRMA

Please take notice that at the Council meeting held on May 6, 1947, it was decided to institute daylight saving time as from Sunday, May 18, 1947, in the Village of Irma.

Business houses and citizens are requested to govern themselves accordingly.

V. HUTCHINSON, Mayor.

VILLAGE OF IRMA

Property owners in the Village are requested to co-operate and clean up their properties as early as they can.

You are asked to do this by May 31, 1947.

A. C. CHARTER, Sec.-Treas.

NOTICE

A ratepayers meeting will be held in the following schools: May 20th—Glenholm school. May 22nd—Roseberry school. May 26th—Ross school.

All meetings start at 8:30 sharp. A good attendance is expected by your councillor.

A. C. ARCHIBALD, Div. 7.

Wedding Bells

DALEY — MIKKELSON

The home of Mr. and Mrs. C. L. Feero was the scene of an afternoon wedding, May 7th, when Vera Delores, youngest daughter of Mrs. and the late Mr. Lars Mikkelsen, became the bride of Gordon Cunningham, youngest son of Mr. and Mrs. G. Daley of Amleto, Sask. The ceremony was performed by Mr. Dietrich Buhler, assisted by Rev. Dan Buhler under a beautifully decorated arch. The rooms were attractively decorated with pink and white streamers and white bells.

Given in marriage by her eldest brother, Mr. Melvin Mikkelsen, the bride was lovely in a white gown with brocade satin bodice featuring a sweetheart neckline, lily points at waist and lily point sleeves. The full floor length skirt was of net over satin. Her fingertip-length veil was held in place by a coronet of orange blossoms. She carried a bouquet of American beauty roses. A gold locket, gift of the groom was her only jewelry.

As bridesmaid, Vera Mikkelsen, twin sister of the bride wore a blue sheer floor-length gown with a matching chapel veil held in place by small yellow flowers. She carried a bouquet of yellow carnations.

Best man was Mr. Howard Schwindt. During the signing of the register, Miss Lillian Mikkelsen sang, "A Wedding Prayer" accompanied by Miss Olive Mikkelsen, who also played the wedding march.

For her daughter's wedding, Mrs. Mikkelsen chose a printed silk jersey dress with black accessories. The bride's table was centred with a three-tiered wedding cake topped with a miniature oil Derrick. On either side of the cake were white tapered vases of pink carnations.

Mr. and Mrs. Daley left on a honeymoon trip to Waterton Lakes in the Canadian Rockies. For travelling the bride wore a green afternoon frock topped by a brown shortie coat. Her accessories were brown. She wore a corsage of talisman roses and lily of the valley.

At the Churches

IRMA UNITED CHURCH

Paschendale—11:15 a.m.

Roseberry—3:00 p.m.

Irma—Sunday school 11:00 a.m.

Public worship 8:00 p.m.

The two Irma services will be on daylight saving time.

The Rev. Burkwall of the British and Foreign Bible society will be in charge.

A hearty invitation to all.

CHRISTIAN AND MISSIONARY ALLIANCE

Education Point—Bible school 11 a.m.

Sunny Brae—Bible school 2:15 p.m.

Irma—Hedley Hall—Gospel service 8 p.m.

A friendly welcome to all.

There is no saving virtue in a religion of flowers, beauty and music. There must be personal faith in the Lord Jesus Christ.

Jesus said, "I am the way, the truth and the life; no man cometh unto the Father, but by Me." John 14:6.

ST. MARY'S CHURCH NOTES

Service will be held in St. Mary's Church on Sunday, May 17th at 3 p.m.

LIGHTNING KILLS SOUTHERN FARMER AND FIVE HORSES

CALGARY, May 12—Bodies of Lungwyn Davies, 35, and his five horses, killed by lightning as they were harrowing a field 15 miles southwest of here Friday, were discovered Saturday by David Davies, a brother of the victim.

Four horses were hitched abreast pulling the harrow while Davies was controlling them with long reins from the saddle of a horse behind the machine. The lightning bolt, believed to have struck at 3:30 p.m. Friday, cut a swath between the horses, laying pairs to left and right.

Glen-Coa Gleanings

A fine gesture of neighborliness was demonstrated in our community last Tuesday, when about fifteen friends turned out with tractors and tillers and drills, etc., to put in the entire crop for Bill Pedel. Bill has been in ill health of late and unable to do his usual farm work. The crew ate dinner at the Smallwood home, where Mrs. P. Nelson and Mrs. Fluevog assisted. Afternoon lunch cared for by Mrs. G. Pedel and Mrs. W. Pedel.

Mrs. B. Gulbrua was able to spend Mothers' Day with her relatives at Veteran.

Sharon Luther League had a special Mothers' Day program on Sunday evening. Many fine musical numbers and appropriate readings were given. Special topics for this day were taken by Mrs. L. Likness and Miss Betty MacKay. Pastor Saugen also brought a timely message showing the influence of a Christian home.

The next Church service at Sharon will be on May 18, at 11 a.m.

Ladies' Aid meets at Mrs. B. Gulbrua's on Thursday, May 22nd.

Mr. Carl Lindquist and his daughter, Lillian, spent several days in Edmonton recently.

Curtis Satre was home for Mothers' Day.

Southern Sayings

Marlene Setter is recovering after an operation at Hardisty hospital.

Mrs. F. Hill arrived home again after her trip East.

Mr. and Mrs. T. Foulkes (nee Mildred Hill) arrived in Irma for a visit with her parents.

Miss V. Sirois was a weekend visitor at the Hearn home.

Mr. and Mrs. B. Ewert and baby arrived at their new home at Wieser's farm.

Community Cook Book

Ice Box Cookies

1/2 lb. butter.
2 cups brown sugar.
2 eggs.
1 teaspoon Baking Soda.
1 teaspoon vanilla.
1 cup walnuts.
4 cups flour.
Cream butter, add sugar, and eggs one at a time, add vanilla and walnuts, sift flour with Baking Soda, add to the mixture.
Shape into a long roll, wrap in wax paper, let stand over night in cold place. In the morning slice thin and bake.

Mrs. Steve Hlynka.

Northern Nuggets

Miss D. Owen spent the weekend at her parents' home in the Jarrow district.

Mrs. A. Emmott was a Tuesday afternoon visitor at the home of her mother, Mrs. W. D. Ramsay.

Miss Edith McRoberts was a Wainwright visitor over the weekend.

Mr. H. Johnston employed the services of Mr. L. H. Bars for his seeding operations last week.

Mr. and Mrs. J. Allen spent Mothers' Day at the home of Mr. and Mrs. Jas. Hill.

Mrs. J. G. Ramsay is spending a few days with her mother, Mrs. Nash.

Mr. Lovig and a buyer from an Edmonton Packing Co. visited Out-our-way early this week.

Mr. R. C. Johnson attended a Council meeting last week at which was discussed the topic so interesting to us all—"Our Roads." A Public Works representative was present.

Minutes of May Meeting M.D. of Wainwright, No. 61

The Council of the Municipal District of Wainwright No. 61 met in the Council Chamber at Wainwright, Alberta on Thursday, 8th May 1947 at 9 a.m. Councillors Dallyn, Spencer, Sutherland, Taylor, Smale and Arthur and Archibald present. Reeve Sutherland presiding.

Spencer—That the minutes of 3rd April 1947, be accepted as written. Cd.

Arthur—That the accounts approved by the Finance Committee and subsequently accounts presented to be approved and passed for payment amounting to \$19,538.27.

Archibald—That notice be given to all persons that their accounts with the Municipal District must be rendered monthly and in the hands of the Treasurer not later than the second Tuesday of each month. Cd.

Spencer—That Dave Sutherland, Reeve, or P.T. Smale Deputy Reeve with C. Wilbraham, Secretary-Treasurer, be the signing officials for the Municipal District at the Treasury Branch and the Bank of Montreal, Wainwright, Cd.

Sutherland—That the Ministerial Order from the Minister of Health directing Township 43, Range 3 and that part of Township 46, Range 3 South of Battle River and Townships 43 and 44, Range 2 and that part of Township 45, Range 2 South of Battle River be attached to the Wainwright Municipal District No. 17 and from the 1st day of May, 1947 be accepted. Cd.

Sutherland—That the Report of the Committee attending the meeting at Chauvin 18th April, 1947, be accepted and the Secretary write the Minister of Public Works on the matters in question. Cd.

Sutherland—That the Secretary advise Dr. H. G. Foulkes of Chauvin that his agreement will terminate on the 8th day of July 1947 in accordance with agreement approved by By-law 43 of the Municipal District. Cd.

By-law 194 authorizing Current Levy 1947 for school purposes presented for its third reading.

Spencer—That By-law 194 pass its third and final reading. Cd. Archibald dissenting.

Taylor—That By-law 193 passed 3rd April, 1947 be annulled. Cd.

By-law 195 authorizing the Current Levy for 1947 for ordinary Municipal purposes as follows presented.

Municipal—17 mills on the assessed dollar.

Wain. Mun. Hosp. No. 17 (old area)—4 1/2 mills on the assessed dollar.

Wain. Mun. Hosp. No. 17 (new area)—3 mills on the assessed dollar.

Provost Mun. Hosp. No. 12—5 mills on the assessed dollar.

Irma Hospital—2 mills on the assessed dollar.

Vale Free Area—2 mills on the assessed dollar.

Doctor—1 mill on the assessed dollar.

Sutherland—That By-law 195 pass its first reading. Cd.

Dallyn—That By-law 195 pass its second reading. Cd.

Smale—That By-law 195 pass its third and final reading. Cd.

Archibald—That under Section 9 of the Tax Recovery Act, being Chapter 161 of the R.S.A. 1942, all parcels of land holding a 1946 Tax Notification or previous notification (which have not been offered for sale) shall be offered for sale by Public Auction on Thursday 12th June, 1947 at 2 o'clock in the afternoon at the Municipal Office at Wainwright, Alberta, terms Cash, and that the Secretary prepare a Valuation List. Cd.

Spencer—That L. Laroque and M. Kokis be granted permits to cut fence posts on any vacant Municipal owned lands in Township 42, Range 5, for the year 1947 and that the fees shall be \$1.00 for each permit issued, and one cent a post for all posts cut. Cd.

By-law 196 for the purpose of providing a discount of 5% on all payments of taxes made in the year in which they are levied if said payments are made prior to the

1st day of November of each year presented.

Spencer—That By-law 196 pass its first reading. Cd.

Sutherland—That By-law 196 pass its second reading. Cd.

Smale—That By-law 196 pass its third and final reading. Cd.

Archibald—That taxes amounting to \$77.51 be reinstated on the NW 9-45-4. Cd.

Archibald—That the Secretary be authorized as a committee to have the Sub-Division known as Central Park being the W 1/2 of the NW 32-44-6 revert back to farm land to be resurveyed into acreage. Cd.

Spencer—That the Secretary take up with the Department of Public Works to have the road one mile West and 12 miles South declared a District Highway. Cd.

Arthur—That the Secretary make application to the Department of Public Works for three Special Grant for one mile south of 15-45-4, \$600.00 and one mile south of 13-45-8, \$300.00 Cd.

Mr. F. W. Maddex, Field Supervisor, met the Council and gave his report. After some discussion as to authorization to purchase, the orders for Warble Spray Powder, \$135.35 and Seed Barley for experimental plots, \$85.65 were approved.

Archibald—That this Council approve the recommendation of the A.S.B. to expend at least \$20.00 in each Division of Weed Control experiments. Cd.

Arthur—That this Council approve the recommendation of the A.S.B. relative to back sloping one or two miles of newly built roads so that the ditches may be seeded to grass. Cd.

Spencer—That this Council endorse the recommendations of the A.S.B. that the salary of the Field Supervisor shall be \$1,800.00 per annum for 1947, \$2,000.00 for 1948 and \$2,100.00 for 1949, commencing 1st June of each year, providing his services are satisfactory. Cd.

Sutherland—That the sum of 10c per mile be allowed the Field Supervisor for miles necessarily travelled in the performance of his duties. Cd.

Taylor—That this Council authorize the A.S.B. to purchase approximately 1,000 lbs of Crested Wheat Grass seed provided the Provincial Government seed test is satisfactory. Cd.

Sutherland—That the report of the Field Supervisor of Warble Spraying be accepted. Cd.

Spencer—That meeting adjourn until 9:00 a.m. Thursday, 12th June, 1947.

The Menace Of Malnutrition

IT IS DOUBTFUL WHETHER there is any place in the world where the food supply is as abundant as it is in Canada at the present time. Considering the amount of cereals, meat, fish, fruit and dairy products which are produced here each year, it would be natural to suppose that Canadians would be among the best nourished people in the world. However, surveys have shown that between thirty and forty per cent. of the population, suffering from some form of malnutrition, or are in danger of falling prey to it. Ignorance of proper nutritional standards, faulty distribution of food and other associated factors are believed to be the causes of the high occurrence of nutritional diseases here.

Is Considered Serious Menace

Health authorities have expressed the view that malnutrition is an insidious disease, more deadly in its effects than some of the others which attract far greater attention. Poliomyelitis is given as an example of a disease which is widely feared and vigorously combated. Yet it is shown that in 1944, the last year for which complete figures are available, there were 38 deaths from polio, while 42 deaths were attributed to nutritional deficiency. Rickets, which is one of the greatest problems connected with nutrition in Canada, leaves permanent deformities and causes many deaths each year. Statistics show that eleven per cent. of the children in this country suffer from rickets, which can be prevented by the use of fish liver oil. Another nutritional disease, found to be very prevalent in some areas, is nutritional anaemia, caused by lack of iron in the diet.

Cause Is Laid To Ignorance

Under the direction of Dr. L. B. Pett, chief of the nutritional division of the department of national health and welfare, surveys have been made in widely separated areas throughout the Dominion and it was from these that the foregoing facts were discovered. Public health services and many other agencies have accomplished a great deal through educational programs and various other means. It is believed that lack of knowledge is the cause of most of the malnutrition found here, since there are very few Canadians to whom the variety of food necessary for a balanced diet are not available. It is in the best interests of any country to improve standards of health and reduce disease in all age groups. Some diseases present complex problems which cannot easily be solved but it would seem that through careful planning of food distribution and through education, it should be possible to eliminate malnutrition as a menace to national health.

IN CASE YOU'RE INTERESTED

Smoking has become more than a habit; it's a national resource. To the tax collector, every wisp, whirling cloud of the cigarette's waste product is spun gold.

While it does not show in the cost-of-living index, smoking is perhaps the most inflated item in the average citizen's daily budget. All of that inflation has been tax-induced.

In most provinces cigarettes sell currently for 33 cents for a package of 20.

Of that price 12 cents is for federal "excise tariff".

This is just about twice what the manufacturer gets for the finished product.

But to his price (6.13 cents) and the 12-cent tariff is added the 8 per cent. sales tax, amounting for another 1 1/2 cents.

To make certain the smoker did his bit in financing the war, Ottawa charged 10m cigarettes 2 cents for every five cigarettes, or 8 cents a pack—"war revenue tax."

Thus, 21 1/2 cents of the 33-cent price is strictly for the government.

But there is more.

Londoners Were Very Adaptable

The late Sir Sidney Kidman, the Australian cattle king who revolutionized the cattle and horse industry in Australia, actually had brought out to Australia twenty-five London bus-drivers (and their families, too) to become boundary riders. Some of them had never been astride a horse before, but they were most adaptable, and very soon proved themselves sound horsemen and able to handle a mob of cattle with the best of the "dinkum Aussies".

LETHAL TIDE KILLS MILLIONS OF FISH

CORAL GABLES, Fla. — Untold millions of yellowish microscopic blobs—less than 1-1000th of an inch in length—were sweeping in a lethal yellow tide from the lower Florida Keys to Cape Sable in the Gulf of Mexico leaving millions of dead fish in their wake.

The deadly tide is composed of a previously unknown type of plankton, the poisonous waste which is killing the fish, Dr. F. G. Walton Smith, University of Miami director of marine laboratory reported.

Dr. Smith said Miami scientists had concluded that some freak of nature has caused this particular type of plankton to reproduce in astronomical numbers.

GEMS OF THOUGHT

THE BEAUTIFUL

In all ranks of life the human heart yearns for the beautiful; and the beautiful things that God makes are His gift to all alike.—H. B. Stowe.

By cultivating the beautiful we scatter the seeds of heavenly flowers, as by doing good we cultivate those that belong to humanity.—Howard.

That which is striking and beautiful is not always good; but that which is good is always beautiful.—Ninon de L'Enclos.

Life and goodness are immortal. Let us then shape our views of existence into loveliness, freshness, and continuity, rather than into age and blight.—Mary Baker Eddy.

The beauty of holiness has done more, and will do more, to regenerate the world and bring in everlasting righteousness than all the other agencies put together.—Chalmers.

Loveliness needs not the aid of fortitude.—James Thomson.

But is when adorned, adorned the most.—James Thomson.

The first issue of the first Russian paper, Vedomosti, published under supervision of Peter the Great, appeared Jan. 13, 1703.

FUNNY And OTHERWISE

Employer (to clerk)—I thought you were sick yesterday?
Clerk—Yes, sir, I was.
Employer—Well, you certainly didn't look very sick when I saw you at the races yesterday afternoon.

Clerk—I didn't? You should have seen me after the fourth race.

"It's a bottle of hair tonic, dear."

"Oh, that's very nice of you, darling."

"Yes, I want you to give it to your typist at the office, her hair is coming out rather badly on your coat."

Have you heard the one about the tough old character who was told by his doctor that he should drink a glass of orange juice after a hot bath?

Doctor met the old fellow two or three days later.

"Did you drink that orange juice?" he asked.

"Gosh, Doc, not yet," answered the old fellow. **"I ain't finished drinkin' that bath."**

Wife: "The doctor said at once that I needed a stimulant. Then he asked to see my tongue."

Husband (alarmed): "Good heavens! I do hope he didn't give you a stimulant for that dear."

"Waiter, this is outrageous! You've raised the price of cottage pudding ten cents a portion."

"Sorry, sir, but you know how the cost of building materials has been going up."

Employer (interviewing applicant for job): "Know anything about electricity?"

"Yes, sir."

"What's an armature?"

"A chap who boxes for nothing."

Albert was taking part in a local concert. He was only seven years old, and recited so well that he was

"Well, Albert, and how did you get on?" asked the proud father, when he returned home.

"Why, I thought I had done all right," replied the youngster, "but they made me do it again."

"Do those fish go about in schools?" she asked her husband, inspecting his catch.

"I believe they do, dear."

"You must have distinguished an infant class."

Said the dresser to the actress: "There's a man at the door who insists on coming in."

"Did you ask him for his card?" inquired the star.

"Yes, but he only laughed and tried to kiss me."

"Oh, let him in," said the actress. **"That's my husband."**

Mr. Potter, dining at the golf club, was amazed to see his wife in cap and apron approaching the table to take his order.

"What are you doing here," he asked.

"Well," she replied, **"it's so nice to see you sometimes."**

"You are charged," said the magistrate, "with having voted eight times. What have you to say for yourself?"

"Charged!" exclaimed the prisoner. **"Why, I was expecting to get paid!"**

West Indies Have Nails Available On Rental Basis

OTTAWA—If you think nails are short in Canada you should hear what they do with them in the British West Indies—they rent them out at so much a nail.

W. F. Bull, chief of the Trade department's export permit branch, told the Commons banking and commerce committee the nail shortage in the Indies was so "critical" that they were used in building only on a rental basis.

"They rent nails out for the putting up of concrete reinforcements and then pull them out afterwards," he said.

Mr. Bull was giving the committee, studying a government bill to continue import and export controls, information on the export of Canadian nails to the British West Indies.

WARTIME CONTROL ON HOG SLAUGHTERING LIFTED

Hog slaughtering quotas established by the Wartime Prices and Trade Board were discontinued on April 19, the Prices Board office announced in Regina recently.

The Board points out that, although hog quotas are suspended, all price ceiling regulations on pork products remain unchanged.

Slaughtering permit holders must continue to file their monthly reports of all livestock, including hogs, slaughtered.

The average depth of the Atlantic Ocean is 2,300 fathoms (two to three miles).

DA VINCI IN NORTH AMERICA — Million-dollar masterpiece, "La Belle Ferroniere," only historically documented Leonardo da Vinci painting in the U.S., is examined by art enthusiast, Natalie Draper.

Britain's Holiday Exchange Scheme For World Friendship

Over 100,000 people in Britain and Europe will spend holidays in each other's homes this year. They are members of the World Friendship Association—a United Kingdom organization founded appropriately enough on May 8, 1945, V-E Day. The countries concerned are Britain, Belgium, Czechoslovakia, Denmark, France, Holland, Luxembourg, Norway, Sweden and Switzerland. 25,000 Dutch families have offered hospitality to United Kingdom guests this year. Denmark has invited 5,000 and other countries are equally hospitable. The scheme works simply. Members choose the centre in which they wish to spend their holidays and the Association arranges accommodation in homes of members there whose tastes and occupations are similar. In return continental members visit their counterparts in Britain. The cost is under \$40.00 per person, which covers fares from port to destination, meals on the journey, insurance and four-day excursions. All other expenses are borne by the hosts. Thus it is possible for peoples of Europe to mix freely and to understand one another's backgrounds on a scale never before possible for people of limited means. These ambassadors of international understanding will play an important part in building world peace.

Alberta Seeking More Nurses

CALGARY—A plan to allow nurses from other provinces to serve in Alberta for three or six-month periods without being required to take out registration in Alberta as well as their home province was presented at the convention of the Alberta Association of Registered Nurses here. It was stated that such a revision of the registration act would encourage nurses to come to Alberta.

Admiral Byrd Sees Polar As Food Storage

WASHINGTON. — Rear Admiral Richard Byrd, returning from the Antarctic expedition, said that long-range planes and dynamic ice-breakers have cracked the great white south polar continent wide open for exploration, and within 25 years men may be tapping its resources.

There's an awful lot of coal down there," he said in an interview. Byrd also envisaged exploiting the vast ice cap as a natural refrigerator for storage of surplus crops in bumper years. "The world need never have another famine," he said.

Returning with about 700 men aboard the expedition flagship, Mount Olympus, Byrd said the area in the south polar regions is not strategically important and it is up to the state department to make any claims "for the enormous amount of area discovered up to this time."

Byrd said he has not yet decided whether to recommend official United States action toward establishing part of the huge ice wilderness as American territory, although it has been said that the United States might justifiably claim approximately 1,800,000 of the Antarctic's known 6,000,000 square miles on the basis of exploration.

The concertina was invented by an Englishman in 1829.

Biscuits that "Click" with the whole family

Magic's Orange-Raisin Biscuits

2 cups sifted flour	4 tbsps. shortening
4 tbsps. Magic Baking Powder	1 1/2 cups raisins
1 1/2 cups sugar	1 tbsps. orange rind
1 egg	1/2 cup milk

Sift dry ingredients together. Cut in shortening until well mixed. Add raisins and orange rind. Beat egg lightly in measuring cup and add milk to make 3/4 cup. Add to first mixture. Roll out about 1/2-inch thick; cut with floured biscuit cutter. Place on greased pan. Bake in hot oven (475°F.) about 12 minutes. Makes 16.

THE DAIRYING INDUSTRY

R. Stanley, general manager of the Northern Alberta Dairy Pool: "It is the government of Canada permits the manufacturing of oleomargarine in Canada they will do a great injustice to the 400,000 dairy farmers of Canada who milk close to four million dairy cows and who have invested large sums of money in cows and who have cows, buildings, equipment and land. It is estimated that some 17 per cent of the population of Canada, directly or indirectly, earn their living from the dairy industry."

Editor's Note: The federal government has refused the manufacture of oleomargarine in Canada.

If you want to increase your income by buying more cattle, the B of M will be glad to finance the purchase, and you can pay back your loan out of your regular milk cheques. See your nearest B of M manager today. Ask or write for folder "Quiz for a Go-ahead Farmer."

BANK OF MONTREAL

GROW MORE BARLEY

FARMERS! There is a **FLOOR PRICE ON BARLEY OF 90 CENTS**, basis No. 1 Feed, delivered **FORT WILLIAM — PORT ARTHUR or VANCOUVER** for all barley sold between August 1, 1947 and July 31, 1948. The price may be higher but it cannot go lower.

Canada is short of barley as feed for live stock. More barley is necessary for the maintenance of Canadian live stock and the production of urgently needed live stock products. Farmers can grow barley this year with the assurance that all barley sold until July 31, 1948 will bring not less than 90 cents a bushel, basis No. 1 Feed, at Fort William—Port Arthur or Vancouver.

Sewing Machine Sense

by Jim Cameron

Considering that about nine out of ten people who own Sewing Machines have no instruction book with their machine, they may find it worthwhile to clip this article and place it in a sewing machine drawer for handy reference. There are over eight thousand makes of sewing machines listed by a well known needle manufacturer. Most of these machines can be classified as Vibrators, Rotaries and Oscillators.

Lower Thread Tension

The Rotaries and Oscillators are commonly called round shuttle machines and have the lower thread tension mounted on a circular piece that holds the bobbin, called the bobbin case, while with the Vibrators, commonly called long shuttle machines, the lower thread tension is mounted on top of the shuttle—it is in the form of a thin blade of spring steel held and adjusted at the front end by a small screw. This screw in the long shuttle machine (and there is also one on the round shuttle bobbin case—sometimes two) is the most critical adjustment that the sewing machine operator is called upon to make from time to time, due to broken bits of thread and accumulation of dust and lint getting under this delicate lower tension spring.

Many sewing machine repairmen claim that this adjustment should not be made by other than an experienced machine man; perhaps this is a good business policy, but I would advise that every operator should make it a point to become particularly well acquainted with this part, especially what is demanded of it: the amount of pull required when the shuttle or bobbin case is held with the left hand and the thread pulled out of it with the right; if this adjustment screw will not tighten or loosen the thread, then a slight bend with the fingers one way or the other will bring the desired effect, but you will have to use your own judgment and practise some.

Upper Thread Tension

The proper setting of the upper thread tension has much to do with the amount of pressure of the lower tension spring for every sewing machine according to design has a particular tension on the upper and lower thread, and these amounts of tension are hardly ever of equal amounts, with many types, the upper thread tension is several times the greater.

The point is, the operator of a machine should become well acquainted with just the right amount of pull required for their particular machine from both the upper and lower tensions; this can best be determined by practice, for the essential thing is a steady even stitch, with the knot buried in the heart of the material being sewed.

Stitch Regulator

The length of stitch-regulator is located in various places on different makes of machines, but usually somewhere at the right hand end of the machine and with practice one becomes acquainted with the proper setting for the length or stitch desired. I mention this for I have really been surprised to find how many sewing machine owners do not know their machine will sew different lengths of stitch.

Presser Foot Regulation

The presser foot has a bar with spring which passes vertically through the front piece. On the top of this front piece and over the bar there is a screw that varies the amount of pressure on the presser foot. It requires turning down (clockwise) for heavy materials, with almost all pressure removed for sewing very light materials.

such as curtains and fine silks.

Bent Needle Trouble

A needle may become bent slightly from sewing over a heavy seam and the bend not be visible to the eye, and since the needle point will still clear the needle hole, it will be considered to be alright, whereas the machine will start to act up and especially to miss stitches; for this reason a new needle should be tried and if the trouble is corrected the old needle should be destroyed.

The Dull Needle

If the point of the needle becomes blunted without becoming bent it can easily be sharpened again on an emery stone by drawing the needle point along the stone with the butt held about twenty degrees above the stone and rotating the needle as it is drawn along to ensure a true point.

Loose Needle Clamp

A loose needle clamp will allow the needle to vary its position in the needle bar, and the point will be inclined to strike either the presser foot or the edge of the needle plate hole. This will dull the needle, perhaps bend or break it, depending upon the speed of the machine at the time, and in case of a machine running at high speed with a coarse needle being used, the bar is likely to become bent and in many cases offset the timing of the machine. So keep the needle clamped tight, but be careful at the same time not to strip the thread on the needle clamp tightening screw.

Loose Pressure Foot

Where the needle may be true and the needle clamp tight—if the presser foot is not also tight, and with the proper setting, it may move just enough for the needle point to catch and the results be the same as with a loose needle clamp, with the added responsibility of the presser foot becoming bent.

Winding The Bobbin

The bobbin winders on most machines have no device to ensure the thread being wound tightly on the bobbins to ensure the proper bobbin action in the shuttle or bobbin case while the machine is in action. To overcome this, allow the thread to pass through the fingers of the left hand on its way from the pool to the bobbin winder.

A common practice in winding bobbins is to place the end of the thread from the spool across the end of the bobbin to facilitate a quick start in winding. This is a good idea, but this bit of thread must be trimmed off before the bobbin is set in the shuttle or bobbin case, as it will interfere with the free turning of the bobbin.

Different Sized Bobbins

Make sure that all the bobbins for your machine are of exactly the same length and that the end discs are exactly of the same diameter.

Needle Size

A good rule to follow in determining proper size of needle is to use fine needles with fine thread with fine cloth, and coarse needles with coarse thread with coarse cloth, remembering that the needle eye must be just large enough for the thread to pass freely.

Commencing Sewing

Before inserting material under presser foot to commence sewing, take hold of the end of the upper thread and, holding it, turn the flywheel over one turn, pull out the lower thread through the needle hole in the needle plate and then lay both threads to the back of the presser foot. By doing this you will avoid a lot of troublesome entanglements.

Removing Sewed Material

When removing sewed material from the machine, lift the presser foot lever and pull the material directly to the back of the machine. This will ensure the upper thread staying within the fork of the presser foot and avoid the bending of the needle.

Don't at any time allow your machine to run without material under the presser foot, as you will wear a groove in the foot or dull the teeth in the feed dog or both.

Other Important Points

Be sure to use the same size of thread on the bobbin as that on the spool. Take off the needle plate at least once a year and remove the dust and lint that gathers around the feed dog. Oil machine regularly with a good grade of fine machine oil. The shuttle race should receive one drop of oil on its surface any day that you do

This liquid asphalt has many uses on the farm. Easy to apply, it coats your roofs and eavestroughs with a hard, tough, weather-proof surface that is fire-resistant. Cracks are filled, rust and leaks prevented. Imperial Roof Putty Flux has unusual filling, sealing and coating qualities that protect surfaces, prolong life, and save on repairs. Here are some of its many uses:

- Protects metal and felt roofs and eavestroughs.
- Preserves bases of granaries and granary skids.
- Waterproofs troughs and cisterns.
- Preserves fence posts and well cribbing.
- Cements window frames.
- Waterproofs cement foundations.

several hours of sewing—the race is the surface upon which the shuttle operates and is the most important spot for oiling on any machine (long or round shuttle). The results are longer life for the shuttle and quieter operation, but the most important thing is the difference it will make in pedalling the foot treadle.

Keep the drive belt just tight enough to grip but not too tight as this will also increase the amount of energy needed on the foot treadle.

"The church makes us the first offer we have of Christian brotherhood, the world's great need to-day."—Very Rev. Dr. John W. Woodside.

"In 1940 when we lost heart because things looked hopeless, the people who never lost heart were the British."—Stuart Richardson.

ONE INCH OF RAIN

An acre of ground contains 43,560 square feet. Consequently a rainfall of one inch over one acre of ground means a total of 6,272,840 cubic inches of water, or 3,630 cubic feet.

As a cubic foot of water weighs about 62.4 pounds, it follows that of a uniform coating of one inch of water over one acre of surface would be 228,512 pounds, or 113 3/4 short tons.

The weight of an imperial gallon of pure water is ten pounds. Consequently a rainfall of one inch over one acre of ground would mean 22,851 gallons of water.

Ten inches of snow equals a water content, on the average, of about one inch of rain.

"Let us resolve not to imitate the inaction of the gully good at the cross in these troubled times."—Rev. Dr. Robert B. Whyte.

Eddie started his job today!

THE MANAGER of the furniture factory in Eddie's town landed a big order. It meant he had to buy a lot of extra lumber, increase his payroll:

He lost no time in putting the whole thing up to the manager of his local bank. Together they worked out how much money he would need to take care of wages and other costs until he delivered the goods: Then, with the backing of his bank, he got to work on the order.

... And that's where Eddie came in. He was put on the payroll—given his first chance to learn a trade. Right now he's on his way home to tell Mom and Dad how much he likes his new job.

THIS IS ONE INSTANCE OF how Canada's 3,200 branch banks play their part in the daily life and work of Canadians.

World of Wheat

by H. G. L. Strange

Conditions in Europe

We have heard in recent months contradictory reports about whether the people of Britain and Europe were well or poorly fed, about whether Britain and other countries were rapidly reviving, or whether they were slipping further back, and about what the chances were for Canada to sell wheat and other products in Europe in the future. The Searle Grain Company, therefore, some time ago decided to send me to Britain and Europe to observe at first hand just what the conditions were.

After some seven weeks away I have now returned with my vivid impressions about what I saw and heard in those countries. For the benefit of the readers of this "World of Wheat" column, I will relate from time to time what I have seen, and I will take the liberty of making suggestions which I think should be adopted in order to help Europe once again to resume her rightful place as the greatest market for Canada's products.

The most vivid and first impression I wish to convey is that Canada is the best country in the whole world in which to be living today. Our people are far better fed than those in Europe and the opportunities here for success, for prosperity and advancement, are miles and miles ahead of any opportunities in Britain or in any other countries of Europe.

Britain faces the most serious crisis she has ever experienced in her history. She is faced with two grave difficulties. The first is to secure sufficient food of nutritive quality for her people—bread, eggs, butter, milk, cheese, meats and fruit juices that supply physical and mental energy, and enable a good day's work to be done.

Britain's other difficulty is to import, mainly from the United States and Canada, machinery for her factories to replace that which was destroyed or damaged during the war. The present loans from Canada and the United States are nothing like sufficient for these purposes.

I was shocked at the appearance of the British people. They are obviously suffering from mass malnutrition. They walk on their heels, their faces are grey and lined, they appear to be from 5 to 10 years older than their age. They are as tired in the morning as when they go to bed. They are incapable of a real day's work. Better food, then, and more of it, is Britain's very first requirement.

Can Canada do anything to help? For myself I think she can and ought to do something because Britain is Canada's greatest single market for wheat, bacon and many other products.

"BEAVER" WINS CANE: A century-old tradition was re-enacted in the port of Montreal when a gold-headed cane was presented to Capt. J. Biset Smith, O.B.E., skipper of the Canadian Pacific Steamships cargo-passenger liner Beaverburn, for being the first to bring a deep-sea ship into Canada's greatest port this year. Capt. Smith, a veteran of both world wars, docked his vessel a scant hour ahead of his nearest rival, climaxing one of the closest races of several years. Above, he is seen receiving the cane from A. G. Murphy, port manager, while Wm. Manson, system vice-president of the C.P.R., looks on.

Research on Weed Control

It has been reliably estimated that the direct monetary loss from weeds in Canada is not less than \$200,000,000 a year. And this is not all. Year after year weeds continue to rob this country of the very soil resources which it is our responsibility and desire to protect and conserve.

Weed Research. The results of controlled experiments and the records of practical experience in this country leave no doubt that, as a source of loss to farmers, weeds rank in importance with plant diseases and insect pests. Yet, what do we find? We have built up large and efficient organizations in Canada to deal with problems relating to the ravages of plant diseases and insect pests; while, with few exceptions, we still consider weeds the incidental responsibility of a handful of botanists, agronomists, and other agricultural scientists. This is not good enough. Our weed problems are enormous, and many of them can only be solved by a well-organized and properly directed program of research. In no field of agricultural research is there today a greater need for an organized national effort than in weed control. Weed control is, in fact, a national problem calling for national effort.

Research Assistance. Realizing the great need in Western Canada for more research on weeds and their control, the Line Elevator Companies sponsoring this Department recently made available to the Division of Plant Science, Winnipeg, Manitoba, the sum of \$31,000.00 for weed research. This grant will be used in 1947 to investigate certain special problems in the field of selective chemical weed control. We are convinced that the results of research on weed control will bring immense financial benefits to the farmers of Western Canada, and through them, to the whole community.

WILLIAMSON COMPLETES
FOURTEEN YEARS IN
RADIO SPORTSCASTING

Probably the most familiar figure in western Canadian sport circles is Gordon Williamson, pictured above. "Gordie" is currently marking his fourteenth year as a sports broadcaster, a career that has taken him across the breadth of Canada, all down the west coast and in many spots overseas. He has broadcast Allan Cup hockey, N.H.L. hockey, Pacific Coast baseball, and many other highlight sporting features. His popular CFRN broadcasts cover all local, district and national events.

RADIOGRAMS

By T. A. Shandro
Canada's Sixth Largest

In preparation for C.J.C.A.'s 25th anniversary celebrations thoughts often went back to the twenties and thirties. One bit of research produced an amazing story—the tremendous growth of business in the area centring around Edmonton.

Using statistical information supplied by Sanford Evans for the years 1936 and 1946 here are some highlights:

In the ten years the gross manufacturing income in C.J.C.A.'s listening area has increased 318%; farm income has gone up 304% and retail and wholesale sales are up 235%. These figures are based on a very conservative estimate and cover the major portion of Alberta, a portion of west-central Saskatchewan and a part of the Peace River Block.

In this same ten-year period Edmonton's growth has been even more stupendous. The capital city's population is up 134%; bank clearings have increased 264%; and construction is really booming, increasing from an annual outlay of less than one million to a 1946 investment of more than 15 million—an increase of 1596%.

All this, plus proportionate increases in most other business, makes northern Alberta Canada's sixth largest market.

T.B. QUESTIONS and ANSWERS

Q. Would light treatments on the chest of a patient with pulmonary tuberculosis cause infiltration?

A. It is a well-known fact that overexposure to sunlight may reactivate pulmonary tuberculosis and thus cause infiltration. The ultraviolet rays from quartz lamps do not have this effect.

Q. With pleurisy on the right side, would there be any danger in exposing the body to the sun?

A. Exposure to the sun is a dangerous procedure for anyone having pulmonary tuberculosis unless the dose is accurately controlled by someone who understands the treatment.

Q. I am twenty pounds overweight and wish to reduce. What foods had I best cut down on? At present I am eating three good meals a day with a glass of milk with each meal.

A. First of all do away with the milk at meals. The fats, sugars and starchy foods usually are the weight-producing foods.

Q. What diet would you recommend in order to reduce in weight?

No special diets can be recommended. Usually eating less food, especially fats and starches, and, if hunger persists, using the green leafy vegetables, will be satisfactory.

Q. Are carefully graduated sun baths now regarded as beneficial in cases of pulmonary tuberculosis?

A. Sun baths probably have no direct influence on the pulmonary tuberculosis, but by benefiting the general condition of the patient, if properly taken under the guidance of a physician, indirect benefit often results.

SPRINGTIME "DON'TS"

Farmers are expected to contribute a large portion of the estimated \$57,500,000 to be spent on painting up Canada during 1947. With the advent of the spray gun which facilitates easier painting, the average rural dweller has become more paint conscious and is realizing that a good paint job on his buildings not only prolongs their life, but makes his farm a pride to the community.

Experts who look at painting with a scientific eye, recommend that buildings when grouped compactly around the farm house, should be treated as one unit. They see no reason why the same color scheme adopted for the house should not be continued, with minor modifications, on the other buildings.

Nine basic painting "don'ts" have been laid down to guide those who intend to put a new dress on their buildings this season. These are:

Don't paint over a wet surface or during wet weather.

Don't paint over a surface that is not perfectly clean.

Don't pile a number of paint coats, on top of the other. In time the coats will be so heavy they will break down of their own weight.

Don't apply paint heavily. Brush out well.

Don't fail to stir the paint thoroughly before application.

Don't apply succeeding coats without allowing sufficient time for thorough drying between coats.

Don't fail to paint surfaces often enough to prevent deterioration. It is false economy to attempt to save money by postponing painting when it should be done.

Don't neglect to read label directions and follow them carefully, particularly with regard to adding thinners.

Don't buy cheap paint and expect satisfactory results.

"GROW ANOTHER HOG FOR BRITAIN"

The Alberta Livestock Co-operative is conducting a campaign to encourage Alberta farmers to produce an extra million hogs this year so that Canada will be able to complete its bacon contract with Great Britain. A campaign is being conducted under the slogan "Grow Another Hog for Britain."

Hugh Allen, president of the A.L.C., points out that the British bacon ration has been reduced to two ounces per person per week—four small slices. He says the British bacon ration depends on western Canada. He points out that farmers can make 25 per cent more by feeding grain to hogs than by selling it into commercial channels, and that after including all costs of hog production, Canada has contracted to supply Britain with 350 million pounds of bacon this year and 400 million pounds next year.

Canadian National

The only difference between the Charleston and St. Vitas Dance is that you do the latter with a trained nurse.

Alfred J. Barber has been appointed district baggage and mail agent, Canadian National Railways, with headquarters in Edmonton. Mr. Barber, who succeeds the late Jack Kerby, will have jurisdiction over the entire province of Alberta and in Saskatchewan west of, but not including, Prince Albert and Saskatoon. With the company since 1911, Mr. Barber has spent his entire career up to now in the passenger traffic department, Winnipeg.

OUR COMPLETE SHORT STORY— VIOLETS FOR NANCY

By EMMIE BELL PORTER

ANNE's face was haggard as she faced her best friend, "Bessie, it isn't that I don't trust Tom... In all the three months we've been married, he has never given me any cause for jealousy."

"Well," Bessie's tone was carefully non-committal, "why have you so suddenly become so upset?"

"This," briefly explained Anne, holding out a small sheet of note paper. "That is a sheet of Tom's memo paper, the kind he uses at the office... here, go ahead and read it."

Bessie took the proffered paper and read: "Remind the florist to send violets to Nancy."

"Well," inquired Anne, brushing her dark hair furiously, "Don't you think I've some cause for alarm?"

"Give the condemned man a chance to speak for himself," hopefully suggested Bessie.

Anne sat down suddenly, the pale pink taffeta of the dressing table making a frame for her slim loveliness. "Are you suggesting that this Nancy might be some unknown grandmother of Tom's?" she demanded bitterly, her voice heavy with sarcasm.

Bessie laughed. "Hey, don't go biling my head off!" she protested. "By the way," she added slyly. "Just how did you happen to get your hands on this little missive?"

Anne bent her head lower to fasten a wide green belt around her slim waist. A deep knit crept past her neck and over her ears. "Why, I was emptying Tom's pockets, getting his suite ready for the cleaners."

Bessie studied her friend critically for a moment. "Imagine a gal like you... million dollar looks... model husband... model home, and still finding time to be miserable over an insignificant scrap of paper which probably means nothing at all."

Anne stretched her long golden legs and carefully adjusted her nylon. "I'll admit Tom's a louse, Bessie, but the note says 'Violets for Nancy.' Her full lips trembled and a defiant hardness crept over the dark eyes. "I'm going to his office to-day during his lunch hour for I intend to find out something about this Nancy."

No, Bessie's voice was shocked, incredulous. "You really intend to mention it to his secretary would you?"

Anne carefully adjusted the brim of a tiny white hat before replying. "Bessie, there's nothing I wouldn't do to keep my husband's love... nothing, by some means or other I intend to get to the bottom of this whole affair. I do not believe in boudoir scenes and the simplest way is to go about the whole matter in a business-like manner."

"You've got to be logical Anne," argued Bessie. "Tom's had that secretary for ten years. I hear she's a treasure. So watch your step and don't make the mistake of thinking the Miss Andrews is naive... she knows all the answers. If I didn't know her name was Hortense, I'd suggest that you check her as your number one suspect! Seeing the look on Anne's face she hastily amended. "Honey, you know I'm only joking... Hortense is a full fifteen years Tom's senior. Seriously dear, I wish you'd give the whole idea up and forget about the violets."

Despite her agitation Anne's voice was calm. "I never compromise Bessie," she said, "Never."

Bessie threw up her hands. "O.K... I give up... I should have known better than to have argued with you!"

At twelve-thirty Anne walked into

her husband's office. "Is my husband busy?" she asked eagerly.

"Mr. Gray left for lunch only ten minutes ago," smiled the efficient Miss Andrews. "Is there anything I can do for you Mrs. Gray?"

This was the moment for which Anne had been planning. "Well," she murmured, keeping her wide gaze on the secretary's face. "It's about the violets for Nancy."

A slight baffled look crept over the secretary's countenance. "The violets," she murmured, "I didn't know you knew about the violets Mrs. Gray."

Anne nodded her head. "Yes, I know," she answered.

"Wasn't it wonderful the way it all started," mused Miss Andrews, looking dreamily out the window. "Imagine a bunch of bachelors being so soft-hearted."

"Really Miss Andrews I must to their house. I don't know the entire story... would you mind telling me all the details?"

Miss Andrews looked at Anne closely. "I hope I am not talking too much," she said. "But as long as you know part of the story you might as well know it all. It began several years ago. Your husband and three other gentlemen, comprised the law firm of Gray, Stevens, Thackery and Bilkins. Mr. Thackery married and in time became the proud father of a baby daughter which the other three gentlemen immediately took to their hearts."

Miss Andrews looked at Anne intently and went on softly. "They lavished every attention on little Nancy, and one custom they gradually grew into was sending her violets every Friday. When Lieutenant Thackery was killed in action the gift of violets never stopped."

She was old enough to start to school this year, so the violets are delivered at five in the afternoon and her mother says Nancy always exclaims, "Look Tommy! Violets from Dad and the boys."

(Copyright Wheeler Newspaper Syndicate)

MANITOBA PIONEER CAMPS

Register Children — At Once

Last summer in its fifth season the new camp on its own beautiful island 97 miles from Winnipeg by train with a six-mile launch trip from the mainland was opened in the Lake of the Woods.

Overlooking a quiet sandy cove a big H shaped building provides cooking and eating accommodation for over two hundred white and two sections of birch-wooded, pine-scented groves offers wonderful cabin locations.

By obtaining pre-fabricated surplus materials from the U.S. Army and transferring them to Pioneer Camp many ideal cabins are going up.

This is a non-profit camp conducted under ideal conditions and competent leadership. Children have wholesome meals, and the group life which they so much need between the ages of 8 to 18. Sports such as archery, handicraft, ping-pong, canoeing, and such happy gatherings as sing-songs by the camp fires are a part of the life—as is Interdenominational Bible study to round out the character and give an emphasis to life.

Children may still be registered for the Girl's Camp July 2nd, to 30th, or the Boy's Camp July 30th to August 13th. But you must act at once! Fees are set very low. Registration is \$2.00 then the camp fee is \$15.50 weekly which includes the fare from Winnipeg to the Camp and return.

Better rush a letter for the attractive Pioneer Camp folder—sent free to the secretary.

Manitoba Pioneer Camps, Room 139 Broadway Building, University of Manitoba, Winnipeg, Manitoba.

If you were a child denied the pleasures outlined above—why not send your offspring where they will be taken care of in God's clean outdoors, where they are gently taught the good things of life by precept and come back to you refreshed, happy and ever grateful to Mother and Dad who allowed them the holiday?

"We're on our way—so watch our spray."

"We're heading for Pioneer!"

Don't judge an egg by the color of its shell which is no indication of the yolk color.

TOP ARMY ADVISOR—Dr. Otto Maas, director of chemical warfare under the department of national defence during the war, will be officially named scientific advisor to Lieut. Gen. Charles Foulkes, chief of the Canadian army general staff. Dr. Maas, born in New York of German-American parents, has been Gen. Foulkes' advisor for a year. He has been named as one of the men who made such thorough preparations for chemical warfare that the Nazis never dared to launch a gas attack on the Allies.

Wrong Menu Gave Farmers A Shock

WEYBURN, Sask.—Two farmers walked out of a cafe here in a huff after taking a glance at the menu. When the proprietor chased after them to ask the trouble, they said they didn't feel like paying \$1.75 for two poached eggs, no matter who poached them. The proprietor explained that the menu they had seen on the counter by accident—was from Hollywood's Brown Derby night club.

"Fighting Mad" Over Slur On English Girls

KNUTSFORD, Cheshire, England.—Joanna Chown, 23, Toronto-born wife of an English army officer, said recently that she was "fighting mad" over a Toronto newspaper article saying that English girls "are not as vicious, smart or intelligent as Canadian girls."

She said the article was written by a Canadian woman who was "worried" about the number of Canadian ex-servicemen who want to return to England.

The article said that if the men returned they would see English girls "looking in dirty, ragged dresses." "It's a lot of malicious nonsense," Joanna said. "It's made me fighting mad."

The "Bea," world's champion jumper, is one-tenth of an inch long but can leap eight inches vertically and 15 inches laterally.

Game Officials Advise Go Easy On Ducks

OTTAWA—Train Rover to retrieve every duck and don't make a target of the bag limit—that's the advice to hunters from federal game officials in a year which will see an estimated 30-per cent. reduction in the continent's duck population.

Hunted by the prospect of a further decline at the hands of nature and malevolent hunters, the officials now are conferring with provincial governments on setting of the 1947 season and bag limit. A Dominion Provincial wild-life conference in February saw the discussions get under way and further consultations are continuing by mail.

But setting quotas and time limits doesn't finish the job. More important, says a spokesman for the wild life protection division of the Mines and Resources Department, are a beneficial nesting season and the good sportsmanship of the hunting fraternity.

"Too many hunters go home disappointed because they haven't shot their bag limit," he added. "That's not what we set it for. It is intended to be an outside maximum, not a target."

Other hunters don't bother to chase a fallen duck into a swamp where the bird, not counted on the bag limit, is left to die. A good retriever, the expert says, can cut down on the wastage. Some ducks are maimed and prevented from mating. United States officials recently X-rayed a typical series of live wild ducks and found 39 per cent of them carrying birdshot.

Last year's outside limit in Canada was 12 birds a day and a maximum of 150 in the 2½-month season. In the light of figures released in Washington showed a sharp decline in the population, this year's season and bag limit will "almost certainly" have to be reduced, the official said.

Albert Dyer, Chief of the United States fish and wild life service, disclosed that a mid-winter survey of the continent's duck population indicated a total of about 14,000,000 compared with 80,000,000 in the same period last year.

Game officers say much depends on the nesting season this year. Good conditions could bring a large crop of ducklings and restore the population to normal very quickly, but a drought or excessive rainfalls can lead to severe depletion and a long-run decline.

RECIPES

PEANUT BUTTER CRUMBS

PIE SHELL

4 cups cold butter
2 tablespoons sugar
1 tablespoon flour
2 tablespoons melted butter
4 tablespoons peanut butter
Crush corn flakes into fine crumbs; add sugar and flour; mix well. Combine butter and peanut butter; mix with crumbs. Press evenly and firmly around sides and bottom of pie pan. Bake in moderate oven (350 deg. F.) 7 to 10 minutes. Cool before adding filling. Prepared pudding mixes make good filling for this pie shell. Yield: 1 8-inch pie shell.

HONEY CORN FLAKE MUFFINS

2 cups corn flakes
2½ cups sifted flour
4 teaspoons baking powder
½ teaspoon salt
1 egg, well-beaten
1 cup milk
½ cup honey
3 tablespoons melted shortening
Crush corn flakes into crumbs. Mix with sifted dry ingredients. Add egg, milk, honey and shortening. Stir only until combined. Fill greased muffin pans two-thirds full. Bake in moderately hot oven (425 deg. F.) about 20 minutes. Yield: 12 muffins (2½ inches in diameter).

300 British Industries Ready To Come To Canada

OTTAWA—W. J. Cairns, secretary of the Eastern Ontario Associated Boards of Trade, said that 300 British industries are ready to move to Canada as soon as buildings are available for them.

He had been given definite assurance of the desire of British manufacturers to emigrate to Canada, he said in an address to a quarterly meeting of the boards. He urged that a special effort be made to induce these British industrialists to settle their industries in eastern Ontario.

JOKING WITH JUDGE NOT GOOD POLICY

In the United States, a man named Joshua was charged with the illegal manufacture of whisky. It was not such a serious offence, and the judge remarked jestingly, "Are you the Joshua who made the sun stand still?"

"No," replied the man, entering into the spirit of the joke, "I'm the man that made the moonshine. And after that his plea of not guilty didn't do him much good."

Concrete Plaster Cistern

Wherever men live in the world of their vital problems is to obtain an adequate supply of water. Frequently the problem is a question of storage facilities, and in these cases a cistern is a common answer. We publish this article for F.W.A., of British Columbia.

It is quite easy to make a plastered cistern in a cellar if the ground is firm enough to stand up well. It is better to make such a cistern slightly funnel-shaped, or larger at the top than at the bottom, which shape gives the sides greater stability than would be the case with vertical sides. Simply excavate the hole, making the walls as smooth as possible and

support the weight of the man plastering the sides.

For lining the walls use the same mixture, adding enough water to make a mortar of correct consistency for application with a plasterer's trowel. Apply the first coat starting at the bottom. Before the mortar hardens score or scratch the surface to provide a key for the second coat. Two coats of mortar making a thickness of not less than ¾ inch will be satisfactory. The second coat may be applied a day or two after the first one.

To make sure of a water-tight job give the surface a wash of neat cement and water applied with a white-

This diagram of a concrete plaster cistern installation illustrates the recommended bowl shape which gives strength to it.

you are ready to proceed with the lining.

Mix a batch of stiff mortar of a mixture of 1 part of cement to 2½ parts of concrete sand which has been put through a quarter-inch mesh screen, adding 10 pounds hydrated lime to each sack of cement used. Spread this over the bottom, making the layer not less than one inch thick. Smooth and tamp the plank, then lay a few pieces of plank on it to

wash after the plaster has hardened thoroughly.

An important part of such a cistern is the overflow drain which should consist of a 4-inch farm tile run from the top of the cistern to any open ditch near by which is low enough to serve as an outlet. A cistern of the size in the accompanying drawing will hold about 1,150 gallons. Covering this cistern with plank will be quite satisfactory.

Burglar Takes Time To Make Toast

AJAX, Ont.—When a thief stole two diamond rings valued at \$800 from the home of W. B. Bennett while Mrs. Bennett and her daughter slept 20 feet away, he took time out to make himself some toast and used fresh butter from the family refrigerator.

PROBLEM WAS TOO MUCH FOR COUNCIL

If one Eskimo can use his family allowance cheque to buy a rifle, should you allow a group of Eskimos to pool their cheques to buy a hunting boat?

Roy A. Gibson, deputy commissioner of the Northwest Territories, posed that problem before the N.W.T. council recently as it met publicly for the first time in 42 years. The meeting reached no decision.

"SALAD" TEA

Outstanding Quality

Delicious CRUMB COFFEE CAKE

Recipe

Add 1 envelope Royal Fast Rising Dry Yeast and 1 teaspoon sugar to ½ cup lukewarm water, stir and let stand 10 minutes. Add ½ cup milk, add 3 tablespoons shortening, ½ cup sugar and ½ teaspoon salt; cool to lukewarm. Add 1 cup sifted flour to make a batter. Add yeast mixture and 1 beaten egg. Beat well. Add 2½ cups sifted flour or enough to make a soft dough. Knead lightly; place in greased bowl. Cover; let in warm place, free from draft, let rise until doubled in bulk, about 2 hours. Roll out dough to 16 inches square. Place in greased shallow pan. Let rise in warm place, free from draft, until light, about 1½ hours. Prick top with fork and brush with 3 tablespoons melted shortening. Cream 3 tablespoons butter or shortening, add 3 tablespoons sugar gradually, mixing well. Add ¼ cup sifted flour, ¼ cup dry cake or bread crumbs, and ½ teaspoon cinnamon; stir until well mixed and crumbly. Sprinkle on top of cake. Let rise again in warm place about ½ hour. Bake in moderate oven at 400° F. about 20 minutes.

LLOYDMINSTER BULL SALE.

One hundred and twenty-six animals will be offered at the 28th Annual Lloydminster Bull Sale. They are listed 122 bulls, 57 Short-horns, 1 Aberdeen Angus and 54 Herefords, and 14 females, 10 Herefords and four Shorthorns. Prospective buyers are assured of an opportunity to secure well bred sires of proven blood lines. This sale is unique in that it is an inter-provincial event. Entries received cover a territory west to Clover Bar, Alberta, east to Kelvington, Sask., and south to Hayter, Alta. The contributors with the largest number of entries are: E. Plaxton, Wainwright (eight Herefords), A. A. Mitchell, Lloydminster (eight Herefords), H. Geck, Kelvington, Sask., and J. S. Cross, Vermilion, Alta., each have four entries. R. H. Byers, Clover Bar, Alberta, has four Shorthorns and the lone Aberdeen Angus entry is from T. Townley-Smith, Lashburn. J. W. Durno, Calgary, and Don E. Ball, Edmonton, are the auctioneers. The Hon. I. C. Nollet, minister of agriculture, Province of Saskatchewan, will officially open the sale. The event is sponsored by the Lloydminster Exhibition Association. For catalogues apply to Geo. K. Ross, secretary-manager, box 47, Lloydminster, Sask. A district calf club show and sale is also sponsored by the Exhibition Association, 14 clubs from both sides of the border participating. Over 200 fat calves will be sold by auction on May 26.

LOCALS

Mrs. Wm. Archer of Notikewin arrived in Irma on Monday last to visit with her parents, Mr. and Mrs. Reeds.

Mr. and Mrs. V. Hutchinson are visitors to the city this week.

Mrs. M. Tripp returned to Irma last week after spending the winter at Melrose Highland, Mass.

The Irma C.G.I.T. held a very successful tea and bazaar last Saturday. The money thus raised will be used for camping funds.

We are pleased to report that at the graduating exercises in Convocation Hall, University of Alberta, on Monday last, the prize awarded by the Women's Auxiliary of the University hospital for the highest standing in the Junior year went to one of our Irma girls, Miss Edith McRoberts.

Keep in mind the Legion Sports Day, June 11th.

So its daylight saving time for us, beginning next Sunday. The very thought of that hour earlier makes us yawn.

Miss Lillian Mikkleson has accepted a position with the Wainwright hospital for the summer months.

Baseball is in full swing around Irma now. The senior and junior teams are warming up but as to the Trail Rangers, they are in action. We understand that they went down to Jarrow last Monday evening to play against the Jarrow Trail Rangers and won by a score of 28 to 13. Both Target and Long pitched for Irma with Jones as catcher.

The girls softball team is also a going concern. The Wainwright girls were to play on Wednesday May 7th. This game was also an Irma victory, the score being 17-15.

The Irma Board of Trade will hold their meeting Tuesday, May 20th at 8:30 p.m. A large attendance is requested.

With Daylight Saving Time going into effect at Irma on Monday May 19th, the hours at the local depot will be as follows:

Agent's hours—9:30 a.m. DST to 6:30 p.m. DST. Noon hour will be from 2 to 3 p.m. DST. Clients will kindly take note. The Eastbound local will arrive at 11:50 a.m. DST while the Westbound local will arrive at 5:40 p.m. DST.

Don't forget the 4th of June is the date set for the annual cleanup day at the cemetery.

Mr. H. L. Black is building an addition to his residence here.

Irma is to have a rest room very shortly. A delegation met with the town council on Thursday and it was decided that the rest room which has been planned jointly by the W.I. and the Village Council will be built behind the town office. This building is to be put under construction as soon as possible and to have a resident caretaker.

Mr. and Mrs. Gordon Fenton motored to Provost last week end to visit with Rev. and Mrs. Longmire.

"The temptation of the church is to withdraw from the world or to become part of the world, to be otherworldly or full of the world, but its true function is to be in the world yet not of it, to influence national events and not leave them to statesmen and economists." Rev. Dr. Norman Coll.

WORLD OF WHEAT

The Indian Summerfallow

Quite a lot of interest has been caused by a new method of summerfallowing that has been practiced in recent years by a number of farmers in west-central Saskatchewan.

It appears that a farmer several years ago, probably by accident neglected to summerfallow his land and so a great growth of weed plants occurred which set to seed. Early the next spring the farmer burnt off the crop of weeds and sowed the land to wheat, probably not expecting to get much crop. To his astonishment he harvested quite as good a crop as his neighbor and his field apparently had fewer weed plants. Other farmers noticing this have practiced this method and report good results.

The Dominion Experimental Farm at Scott took note of this and, being always alert for new things, laid down some plots for study. The results gave them enough justification to carry on with their experimental work. More information is needed about this new method. If it really works it will save the cost of summerfallowing and prevent some soil-blowing in some districts. Those farmers who care to try this new method of summerfallowing on a small field should write to Mr. G. D. Matthews, superin-
